

How To Reverse Your 9 Digits Medicine Cabinet:

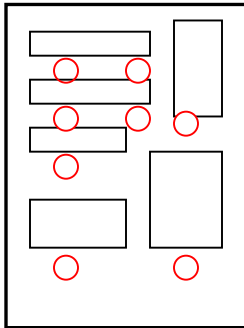

Step 1: Decide how you would prefer your 9 Digits Medicine Cabinet to hang. When you receive your cabinet the hinges are on the **Right**.

Option 1. Hinges are on **Right** (when delivered) **Option 2.** Hinges are on **Left**

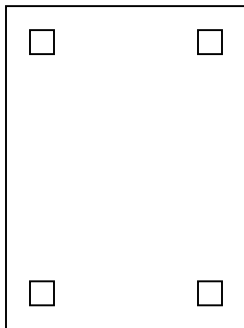

Step 2: To reverse your cabinet, turn your cabinet 180 degrees and you will notice the only feature that requires adjustment is the Personal Cosmetic Organizer.

Step 3: To remove and secure your 9 Digits Personal Cosmetic Organizer:

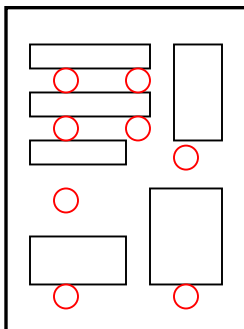

1. Gently pull on several points (see red circles) on the front panel of the Personal Cosmetic Organizer, until you hear an audible “Click”. This releases the fastening material and allows you to remove the front panel.

2. Remove the front panel and the white vacumm form holder.

3. Turn over the white vacumm form and you will see four pieces of **very aggressive** double sided tape. Remove the coated paper from the tape and place the white vacumm form back in place. **Remember** to turn the vacumm form **180 degrees** if you are **reversing** your cabinet or place it back in the same direction to only secure the vacumm form.

4. To reinstall the front panel, place the top edge of the panel into the top groove of the Personal Cosmetic Holder box. Place the bottom edge of the panel in the bottom groove of the Cosmetic Holder box. **Press** on the flat areas of the panel to reengage the fastening material (see red circles) until you hear an audible “Click”.

Enjoy your 9 Digits Medicine Cabinet!!
